Acknowledgement is made of Applicant's IDS received 1 June 2004.

**Priority** 

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

Applicant's election of species C<sub>8</sub>(CF<sub>3</sub>)<sub>8</sub>, the fluorinated spherical carbocyclic cage molecule with magnesium as the halophilic metal in the reply filed on 26 January 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 6-8, 11, and 12 are withdrawn from examination because they are drawn to non-elected species.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-5, 9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eaton et al. (Adv. Materials, 2000) in view of Forsberg et al. (US 5,407,500).

Art Unit: 3643

As to claims 1, 5, 9, and 10, Eaton discloses a pyrotechnic composition capable of producing IR-radiation comprising a carbocyclic cage molecule (octanitrocubane). Not disclosed is the carbocyclic cage molecule being fluorinated and a fuel of a halophilic metal, magnesium. Forsberg et al., however, discloses the use/substitution of fluoro with nitro groups on a ring molecule (col. 4 lines 50-58) that is exothermic (col. 1 lines 14-20) and magnesium as a fuel (col. 34 lines 3-7). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the composition of Eaton et al. by using fluoro groups instead of nitro groups and Mg as a fuel as disclosed by Forsberg et al. depending upon use of the composition.

As to claims 2-4, the limitations of claim 1 are disclosed as described above. Not disclosed is the exact formula as given by the expressions disclosed in these claims. It would have been obvious to one of ordinary skill in the art at the time of the invention to further modify the composition of Eaton et al. as modified by Forsberg et al. to use these expressions for the composition depending upon use of the composition.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eaton et al. (Propellants 2002) disclose in the prior art the use of carbocyclic cage molecule.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Gellner whose telephone number is 571.272.6887. The examiner can normally be reached on Monday-Friday, 8:30-4:00, alternate Fridays off.

Application/Control Number: 10/784,025 Page 4

Art Unit: 3643

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on 571.272.6891. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Off WAR
